-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 9 and 12-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yanagisawa et al. US 20030088006.

3. The rejection set forth under 35 USC 103 in the paper mailed 4/3/09 is deemed proper and is herein repeated. The newly amended claims and remarks filed in support thereof have been fully considered. Applicant has amend the claims to recite that the crumbs of step C) have a moisture content of 40% or more. It is argued that the art cited fails to show this limitation. This is not persuasive. [0094] clearly teaches a moisture content of "about 40%." This anticipates the claim limitation. Further, the disclosure is not limited by this example and higher moisture amounts are obvious. Applicant then argues that the claim limits the dehydrating step to require "temporarily making an inner pressure of the barrel ... higher than that at normal operation." This is not a patentable distinction. The art clearly suggests using an extruder in the dehydrating step as claimed [0096]. The pressure is not reported as constant or manipulated. The fact of the matter is that extruder chambers are known to be pressurized environments and the manipulation of the pressure within the chamber is easily manipulated. Temporarily adjusting the pressure is considered an obvious

process step when dehydrating rubber crumb. There remains no showing or allegation of unexpected results predicated upon the temporary manipulation of the pressure within the chamber.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
